The screenshot shows the QGIS application interface. The top menu bar includes 'Projeto', 'Editar', 'Exibir', 'Camada', 'Configurações', 'Complementos' (highlighted with a blue circle containing '08'), 'Vetor', 'Raster', 'Banco de Dados', 'Web', 'Malha', 'Processamento', and 'Ajuda'. The 'Complementos' menu is open, showing options like 'Gerenciar e Instalar Complementos...', 'Terminal Python', 'Analyses', 'GRASS', 'MapbiomasCollection', and 'PostgreSQL history viewer'. On the left, the 'Camadas' (Layers) panel shows a tree structure with 'Brasil Unidades Federacao' expanded, revealing 'Brasil_Biomias' which is also expanded, listing the six biomes with their corresponding colors. The 'Navegador' (Navigator) panel at the bottom left contains a list of favorite locations. The main canvas displays a map of Brazil where each state and federal district is colored according to its biome. A legend on the left side of the map area provides the key for these colors.
